

ISIJET 1840 Forced Air Dryer

Production Drying for ISIJet 1840 / ColorSpan DisplayMaker® 72S

With the **ISIJET 1840 Forced Air Dryer** you can now produce a wider gamut of jobs on the ISIJet 1840 or ColorSpan DisplayMaker® 72S solvent-based printers. This production-ready unit uses heated forced air to supplement the drying capacity of the built-in heated platen on the ISIJet 1840 / ColorSpan DisplayMaker® 72S. It can also be used with other solvent-based printers in need of additional drying power.

The **ISIJET 1840 Forced Air Dryer** contains four individually controllable heaters, allowing the coverage and heat intensity to be adjusted for media ranging from 18" to 72". The convenient stand allows the unit to be easily moved from one printer to another. In addition the heater head unit can be positioned vertically and angled to allow adaptation to different media and printers.

ISIJET 1840 Forced Air Dryer Features / Benefits:

- › Four individually controllable 750/1500 watt forced air heaters for flexibility to dry varying material widths with the optimum heat level.
- › Allows drying of materials in faster print modes.
- › Air flow over material helps speed drying by removing solvent saturated air from surface of material.
- › Easy adjustment of dryer height, angle, and distance from material. Adaptable to other printers.
- › Dryer and Stand - 80" W x 49" H x 30" D, 170 lbs.
- › 208-240VAC, 50/60 Hz, 25 amps (30 amp service)
- › One year warranty
