

# ProofMaster Professional

## Dedicated Textile RIP

Windows operating system	98, 2000 & NT
Unicode language Communications	English, German, Chinese, Korean, other languages on request
Direct driver printer support	Parallel, Ethernet, USB, Serial, GPIB, Firewire, SCSI
	ColorSpan DisplayMaker ColorSpan FabriJet
Production Simulation	Tonal screens (Penta, Nova, Galvano, Gravure, etc.) Selectable screen/mesh Tonal gradation curve Overprint
File types	Indexed palette (8 bit) Automatic separation of indexed files RGB / CMYK (24 & 32 bit) ** Grayscale separation (8 bit) Black/White separation (1 bit)
File formats	Most graphic formats; TIFF, BMP, AI, TGA, etc. Industry formats; CST, MST, PUB, GRT, SEP
Color management	CIE based profile Supports up to 12 printer colors Supports multi-ink sets (2x6, 3x4, etc.) Supports light shades Online creation of profile using spectrophotometers *** Online linearization with measurement device ***
Color control	Maximum ink level control CIE (LAB, HCL, XYy, XYZ) color specification Separation to spot color matching Automatic calculation of tonal gradations User controllable ink mixing * Color/Separation overprint support
Print	Real world size control (Inch, CM, MM, Meters, Yards) Scaling with our without retaining aspect ratio Step & Repeat with user selectable 'Drop' Page positioning Registration mark option User definable layout (Color chips, Text, etc.) * Automatic multiple image media-save function * Spool/Batch manager
<p>* Available 2001 ** No simulation features available with 24 &amp; 32 bit images *** Compatible with Gretag, X-Rite, Dr. Lange, DataColor, etc.</p>
